4000 MILES OF LAWRENCE'S OF LAWRENCE'S OCCUPYING DUTY

LAWRENCE, Feb. 15.—The strike action brought on a big rise in the City Council today. Alderman Paul Hennessey declared that the city government was spending and absorbing illegally. He said he would do up to 4000 miles of the streets, young men of Lawrence into an auxiliary police department to help take care of the city.

Councilman J. Lynch, the head of the police department, was ordered to begin the organization of the men at once. They were to be paid by the city while they were being trained for police duty.

This action was taken as a result of the criticism of the city government by Governor Fox and Assistant Attorney General Paul Hennessey in a speech said:

"The Government and the Assistant General are right. The police department is doing nothing. There are twenty men on the force who have to be kept on and off duty. The department is doing nothing. The Government is depriving. The Government is depriving."

Yates in the Grip

William Yates, the strike leader, who succeeded Joseph J. Egan, whose trial for alleged conspiracy to murder was postponed, is now in the grip of a cold. Yates is now in the grip of a cold. Yates is now in the grip of a cold.

Many Facing Eviction

These are Sample Dresses from two of America's foremost manufacturers. If this sale were to take place two weeks later instead of tomorrow, these 600 sample dresses would not last until noon. Such a sale, however, could not take place two weeks later. In two more weeks (March 1st, remember) women would be glad to get these dresses for at least 50% more than our Friday prices. Why? Because thousands will be wanting wash dresses then where hundreds are ready to buy now. This is one of those great introductory bargain events at 1/2 price to start the season with a quick step. It is one of those once-in-a-lifetime good luck occasions, that enables the "chosen few" to get a real bargain price. Be one of the "chosen few" to come here tomorrow. Your opportunity is as good as anyone else's. And please bear in mind first of all—the styles, qualities and clever little ideas in trimmings are so wonderful that there is absolutely no excuse for such dresses being seen in the company of such prices.

1. *Chlorophyll a* and *Chlorophyll b* were determined using a spectrophotometer (Shimadzu UV-160U) at 663 nm and 646 nm, respectively. The concentrations were calculated using the following equations: $\text{Chlorophyll } a = 12.7 \times \text{OD}_{663} - 2.13 \times \text{OD}_{646}$ and $\text{Chlorophyll } b = 21.6 \times \text{OD}_{646} - 5.1 \times \text{OD}_{663}$ (Arar and Parsons 1972).
